

4-6 October 2019

Conference

Sustainable Agricultural Practices and Innovative Solutions

Donald Aquilina

Team Leader EU Technical Assistance Project for Implementation of Farm Advisory Services in the northern part of Cyprus

Project Contacts info@tcc-farm-advisory.eu www.tcc-farm-advisory.eu 0392 228 3755 ext. 126

Partners:

What do we understand by *sustainable agriculture*?

There are 3 main goals...

Sustainable Agriculture

Economic Viability

Social Acceptability

Environmental Integrity

Some Challenges and Opportunities...

Habitats and Biodiversity

Climate Change

Resource Management

Food and Feed

Economic Viability

Culture and Values

Why is it Important? Some facts and figures...

Key Indicators	EU average	Cyprus (if available)
Food waste	327kg per capita	541kg per capita
Biodiversity	Declines of 2/3 of indigenous species	No data
Water Quality	Nitrates in groundwater 18mg/l	42.7mg/l (WFD 50mg/l)
Soil	5kg/Ha (N) 1kg (P)/Ha surplus in soil	194/Kg/Ha (N): 32kg/Ha(P)
Air	9.8% of total Greenhouse Gas emissions originating from agriculture	5%
Training of farm managers	32% of all FT and PT	7%

How the EU Policy 2021-2027 for Agriculture aims to achieve this?

ENSURE

FAIR INCOME

INCREASE

COMPETITIVENESS

9 New Strategic Objectives

- 1. Ensure a fair income to farmers
- 2. Increase competiveness
- 3. Rebalance the power in the food chain
- 4. Climate change action
- Environmental care
- 6. Preserve landscapes and biodiversity
- 7. Support generational renewal
- 8. Vibrant rural areas
- 9. Protect food and health quality

RURAL AREAS

REBALANCE

POWER IN FOOD CHAIN

CLIMATE CHANGE

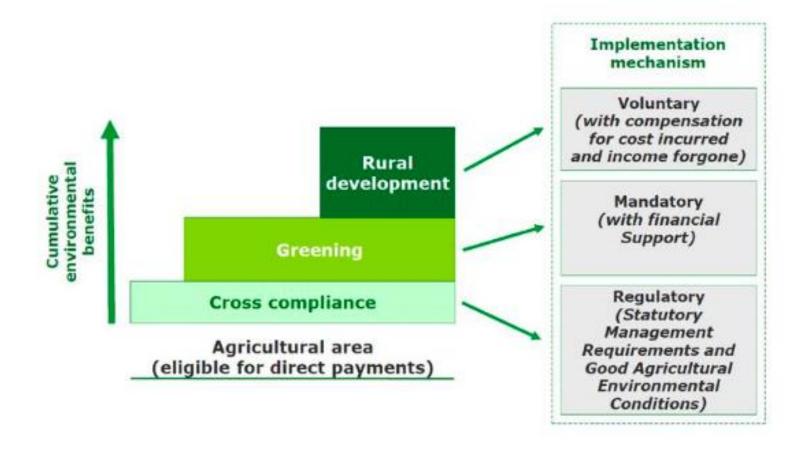

ACTION

CAP tools for sustainability

Some of the obligations for EU MS and Farmers....

- CAP payments linked to sustainable agricultural practices
- Cross Compliance rules for farmers (SMRs and GAECs)
- Controls, monitoring and enforcement

In northern part of Cyprus

- Approximation with EU acquis Chapters 11 and 12 limited
- Local support not coupled with any sustainable development goals
- Cross Compliance not obligatory
- EU Grants promote investments linked to compliance
- Limited controls and resources in place

Key Principles for ensuring more sustainable agriculture

- Coherent and synergistic policies;
- Appropriate governance;
- Recognition of the farmers role in delivering public goods;
- Coupling financial support with sustainable agri-practices.

Tools, Approaches and Innovative Instruments

- Investments in physical assets on farms
- Knowledge transfer, cooperation and demonstration
- Farm Advisory Services
- Business Development
- Networking
- Research frameworks

How the EU is helping the Turkish Cypriot Community?

- Grant schemes for farm investments (Renewable energy, more efficient machinery, water saving technology, etc)
- Grant schemes for SMEs (Recycling, bio-products, etc)
- Technical assistance projects such as FAS, animal eradication, community development, civil society, etc
- Various projects such as water treatment facility, biosecur ity facilities, etc.
- A total of 235 projects contracted to the tune of 13.8 ME;
- Another 5ME worth of grants currently under evaluation;
- Other local funding...

Farm Advisory Services in the northern part of Cyprus

- 30 month project to support with skills development, provision of advice, awareness raising;
- 2nd Phase of EU Technical Assistance support;
- FAS Strategy prepared;
- 54 local trained advisors engaged to deliver a variety of se rvices;
- Over 900 consultations delivered to date;
- More than 450 farmers benefitted;
- Launch of FAS website <u>www.tcc-farm-advisory.eu</u>

Farm Advisory Services in the northern part of Cyprus

FAS offered is free of charge and covers:

- Advice on minimum standards;
- Support with preparation of application ns for EU Grant schemes;
- Support with project implementation.

Opportunities for the northern part of Cyprus A more sustainable & competitive agriculture through....

- Increase/diversify productivity/services whilst ensuring sustaina ble resource management and preservation of environment;
- Adaptation to climate change (new/old varieties, diversification ...)
- Mitigating effects of greenhouse gas emissions (forestry, Renew able Energy)
- Faster transfer of knowledge from research to practical farming (FAS, demo, cooperation)
- Faster feedback on practical needs to science (Needs)

....basically "Achieving more from less"

Opportunities for the northern part of Cyprus

Start acting now before its too late...

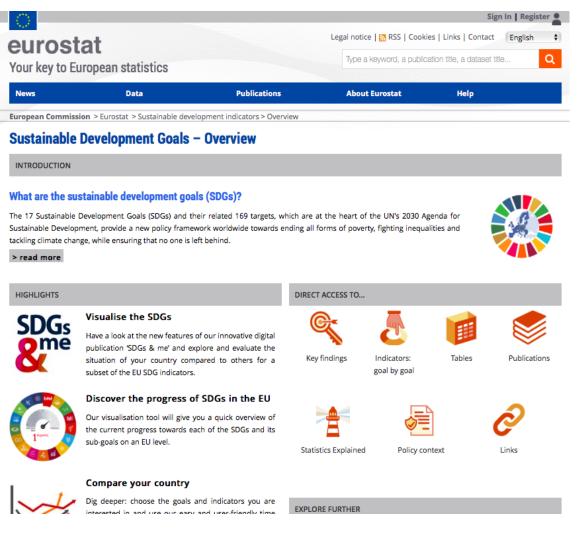

Keep up to date with what is happening around you...
